About Us

DishaLive Group is working in many sectors to develop new solutions that help to make a happy and innovative world. DishaLive Group is working in the IT sector since 2016 with the name DishaLive Web Design and Solutions. We have created thousands of websites, developed tons of custom applications (ERP, CRM, HRM), and provided 360-degree digital marketing services to our valuable clients.

DishaLive Group developed bulk messaging software with an advanced chatbot, that helps to promote your business on WhatsApp through the Bulk Messaging tool, and our smart chatbot helps to convert leads into paying customers easily. This software provides you with a group extractor tool to get more relevant customer data. Our development team regularly working on it to make it more advanced & unique

DishaLive Group launched Sahitya Live a digital platform for the authors to share their thoughts & articles with the world. Where thousands of authors write regularly on the web portal (www.sahitya.com), and digital magazines, participate in online Kavi sammelan and competitions, etc. We also launched a web portal for blood donors. Where anyone can find the nearest blood donor easily.

Website development is an extra expense for the business. Developing a valuable website is difficult for new startups and middle-class businesses. But in the digital world, there is no professional identity without a website. Hence DishaLive Group launched MyDL.in Website Builder to provide the best website at the lowest price. We not building just web pages, we provide you with solutions to generate quality leads and inquiries from your website. DishaLive Group regularly works to build a brighter future with innovative ideas.
